ACM PARTS LAUNCHES BIGGER PREMISES IN NSW

Australian automotive parts supplier ACM Parts has taken the next step in its expansion plans by moving its NSW operations to a huge warehouse complex at Smeaton Grange.

The new site will have more than triple the storage capacity of the previous facility in Huntingwood.

ACM Parts CEO Mike Kirkman said the move was an important milestone for the NSW business, which has increased the size of its workforce by 50% in the past 12 months.

“This move signals a new phase in ACM Parts’ development in NSW, as well as nationally,” Mr Kirkman said.

“The warehouse capacity at Smeaton Grange means we can deliver on our promise to be a faster, more cost effective and more comprehensive supplier to Australia’s collision and repair industry.

“We needed a much bigger footprint to be able to handle the volume of quality-checked recycled parts, ACM Certified Parts and OEM parts required by today’s industry.”

We are pleased to announce that Dean Hickey from Dean's Tyres, Brakes and Mechanical Repairs is the winner of our Smeaton Grange Trade Day door prize. Dean wins two VIP tickets to State of Origin game 2.

A big thank you to everyone else who attend our first ever Trade Day at our new Facility in Smeaton Grange. We'll see you all at the next one.

Customers can look forward to faster deliveries and a surge in stock levels as the new facility reaches capacity.

We stock all makes and models. See inside for more!

ACM PARTS LAUNCHES BIGGER PREMISES IN NSW

Double the size of the Huntingwood warehouse at 10,000 square metres, the complex also boasts triple the storage capacity, which will take ACM Parts inventory from 35,000 to 150,000 parts.

The move to Smeaton Grange complements ACM Parts' investment in new route optimisation technology to cut down on delivery times, and the expansion of its delivery fleet to 23 vehicles.

As well as faster delivery times, customers can expect ready access to a larger variety and quantity of recycled parts, with the number of cars pulled apart each week also expected to double to 100 after the move. The launch event attracted scores of local repairers and assessors and featured a presentation from international guest Bob Frayer, Director of Automotive and Aftermarket Certification Program for NSF International, which certified ACM Certified Parts.

GUARANTEED QUALITY, SAFETY AND INTEGRITY.

TERMS AND CONDITIONS: The ACM Parts™ warranty is in addition to the rights and remedies conferred on consumers by the Australian Consumer Law. The warranty does not affect those rights or remedies, except to the extent their application may lawfully be excluded. Individual parts listed are subject to stock availability. No further offers or discounts apply. (Valid only for Capricorn members only) *These Parts are imported by ACM Parts Pty Ltd and ACM Parts does not have any association with any of the Brand Owners. **Calculated off the OEM list price. Both OEM list price and ACM prices are subject to change. While stocks last. ACM Parts Pty Ltd ACN 165 321 979.

ACM PARTS AND CHISHOLM INSTITUTE PARTNERSHIP

ACM Parts will donate cars and auto parts worth \$40,000 to support TAFE students as part of an exciting new partnership with the Chisholm Institute.

The contribution of car bodies and parts for mechanical and collision repair will be used to help train and develop apprentices at Chisholm, which offers students a selection of 14 different automotive courses.

As part of the partnership, ACM Parts and Chisholm students will fully restore a car, which will be auctioned for charity at the end of the project.

ACM Parts CEO Mike Kirkman said he was passionate about supporting students keen on a career in the automotive industry.

“ACM Parts is dedicated to making sure the best people enter the automotive industry and that starts with the provision of high quality education,” Mr Kirkman said.

“Investing in students by making sure they have access to the best possible parts, equipment and knowledge means we are investing in the future of the automotive industry.

“We are absolutely thrilled to be working with Chisholm to support the next generation of automotive experts.”

ACM Parts said the partnership was part of a broader national plan to build strong ties with TAFE providers and the broader industry.

“As a relatively new Australian business with plans to expand, we want to foster the development of a highly skilled workforce,” said Mr Kirkman.

“We pride ourselves on being the leaders in our field and we want to help the students at Chisholm be the same.”

ACM PARTS AND CHISHOLM INSTITUTE PARTNERSHIP

Chisholm's executive director for engineering, technology and trades, Andrew Kong, said there was an "indisputable" link between providing quality education, including access to leading industry partners, and positive student experiences.

"This partnership is unique in that it not only contributes to quality education and training outcomes for students and apprentices entering the job market for the first time, but will also support retrenched workers from areas of the automotive and component manufacturing sector who are seeking to transition into new employment opportunities," Mr Kong said.

"We are very excited about what this partnership will bring to the local community."

Mr Kirkman said he was also excited about what the partnership would mean for local workers.

"ACM Parts is committed to working closely with Chisholm in identifying people for possible employment as part of the regional automotive workforce transition program, to see those retrenched workers retrained and returned to work," Mr Kirkman said.

"We value the skills of workers who have spent part of their career building cars and we want to make a place for them in our business."
